

Nouh benzina

Web Developer

Work Experience

- **Next.js Developer**
 - Company: Foorweb
 - Dates: June 2023 – April 2024
 - Responsibilities:
 - Developed and optimized web applications using React and Next.js for a seamless user experience.
 - Implemented backend functionalities with Express and Adonis, enhancing API performance and reliability.
 - Integrated MongoDB for efficient data management and PostgreSQL for relational data handling.
 - Achievements:
 - Improved page load speeds by X% through performance tuning in Next.js.
 - Collaborated closely with cross-functional teams to implement client requirements effectively.
- **Full-Stack Web Developer**
 - Company: Feeef
 - Dates: April 2024 – September 2024
 - Responsibilities:
 - Led the development of full-stack applications using React and Next.js for dynamic frontend interfaces.
 - Enhanced backend functionality with Express and Adonis, focusing on RESTful API design.
 - Managed data with MongoDB and PostgreSQL based on project needs.
 - Achievements:
 - Delivered key features under tight deadlines, contributing to a successful product launch.
 - Resolved critical bugs and improved system stability, reducing downtime by X%.
- **Full-Stack Developer**
 - Company: CSEN
 - Dates: 2022 – 2023
 - Responsibilities:
 - Developed and maintained web applications, leveraging React, Next.js, and backend technologies.
 - Integrated MongoDB and PostgreSQL for efficient data management and structured queries.
 - Supported team with expertise in Express and Adonis for scalable backend solutions.
 - Achievements:
 - Played a key role in optimizing the application's backend, resulting in a X% increase in performance.
 - Ensured code quality and best practices, improving project maintainability.

Relevant Skills

- Frontend Development
 - Languages & Libraries: JavaScript, React, Next.js
 - Styling: Tailwind CSS, Bootstrap
- Backend Development
 - Frameworks: Express, Adonis
 - Languages: JavaScript, Node.js
- Database Management
 - Databases: MongoDB, PostgreSQL
- Development Tools
 - Version Control: Git, GitHub
 - Other Tools: Docker (if applicable), RESTful APIs
- Additional Skills
 - API Design, Performance Optimization, Responsive Design, Cross-Functional Team Collaboration

Education History

- Self-Taught Full-Stack Web Developer
- Current Student: Technology Department, Saad Dahlab University
 - Year: (2021– 2024)

Achievements

- Winner - Coding Master Hackathon (2nd Edition)
 - Dates: March 2022 and March 2023
 - Developed innovative app variants, showcasing expertise in full-stack development with Next.js, React, and MongoDB.
- Participant & Winner - HackFest Hackathon
 - Successfully competed in various challenges, demonstrating skills in rapid problem-solving and application development.

projects

- **EGSDZ**
 - Description: A learning platform tailored for civil engineering students, offering resources, tutorials, and interactive content to enhance their educational experience.
 - Technologies Used: Next.js, Express.js, Redis, MongoDB, Redux Toolkit, Framor Motion, Tailwind CSS, Bootstrap, ShadCN, Aeternity
- **Feeef**
 - Description: An e-commerce platform designed to function similarly to Shopify, allowing users to set up and manage online stores efficiently.
 - Technologies Used: Adonis.js, PostgreSQL, Redis for backend; Remix for the landing page, and Next.js, React, Remix for customizable client templates. Also utilized Framor Motion, Tailwind CSS, Bootstrap, ShadCN, Aeternity
- **CSEN**
 - Description: A dynamic landing page for CSEN, optimized for performance and seamless deployment, providing a high-quality user experience.
 - Technologies Used: Next.js, MongoDB, Vercel, Framor Motion, Tailwind CSS, Bootstrap, ShadCN, Aeternity
- **Personal Projects**
 - Project Management App: Built with Next.js, offering task tracking and team collaboration tools, showcasing robust frontend and backend skills.
 - Wallet Application: Designed a digital wallet application for secure transaction tracking, focusing on user authentication and data protection.
 - Weather App: Created a weather forecasting app with Next.js and API integrations, featuring responsive design and live updates.
 - Additional Projects: A variety of other projects utilizing React, Next.js, MongoDB, and various frontend frameworks, demonstrating ongoing learning and experimentation.
